```

The flowchart illustrates a scenario-based collaborative problem-solving process. It begins with a 'Root Scenario' (1001), which leads to 'Select Participants' (1002). This step is followed by 'Notify Participants Electronically' (1003) and 'Set Permissions on Data' (1004). The process then enters a loop where 'Receive Participant Input' (1005) is received from multiple 'Participant Scenario' blocks (1011). The input is then 'Evaluate' (1006), leading to an 'Intermediate Scenario' (1007). A decision diamond (1008) asks 'Is Further Collaboration Desired?'. If 'Yes', the process loops back to 'Select Participants' (1002). If 'No', it proceeds to 'Final Solution' (1009) and finally 'End' (1010).
